

RIZKI SEPTI ARDI

Web Developer | Frontend Web Developer

Yogyakarta | +6281226226695 | rizkiseptiardy@gmail.com | LinkedIn | GitHub | rizkiardi.vercel.app

PROFESSIONAL SUMMARY

Web Developer with a Bachelor's degree in Information Technology with over 1 year of experience in website development. Skilled in building responsive website interfaces using HTML, CSS, JavaScript, and Tailwind CSS, as well as developing web applications using React.js, Next.js and Laravel. Experienced in REST API integration and information system implementation, such as the development of the New Student Admissions Information System (PPDB) for Vocational High Schools.

WORK EXPERIENCE

- PT Wesclic Indonesia Neotech** **November 2025 - May 2026 (6 Months)**
Web Developer Intern
Develop and implement web application features using React, NextJS, and Tailwind CSS with a modular, reusable component architecture. Integrate the frontend with a Laravel-based REST API for data management and client-server communication, and translate UI/UX designs into clean, responsive code.
- PT Astra Daihatsu Motor** **March 2018 - February 2020 (2 Years)**
Team Member - Assembly Plant 2
Assembly Plant 2 is an assembly area for several vehicle models, such as Daihatsu Xenia, Toyota Avanza, Daihatsu Luxio, and Daihatsu GrandMax. Work as a member of the production team, responsible for installing the front-left door in accordance with the established SOP. Collaborate with the team to ensure assembly quality and actively provide suggestions for improvements and innovations that support workplace safety and enhance the production process at PT Astra Daihatsu Motor.
- PT Yamaha Indonesia Motor Manufacturing** **January 2015 - December 2016 (2 Years)**
Operator Produksi - Engine Assy Production
The engine assembly is part of the Yamaha motorcycle engine assembly. Work as a Production Operator for the Yamaha N-Max 155 engine assembly team, focusing on installing the engine fan case. Collaborate with the production team to ensure the assembly process runs according to SOP and guarantees that components are installed properly and meet quality standards.

MAGANG & STUDI INDEPENDENT BERSERTIFIKAT (KEMENDIKBUDRISTEK)

- Yayasan Dicoding Indonesia** **August 2024 - December 2024 (4 Months)**
Bangkit Academy 2024 Batch 2 Cloud Computing Cohort
Develop backend applications using various Google Cloud services, and implement and learn machine learning in a cloud environment through a Capstone Project. Participate in system development, cloud service integration, and application deployment. Build your personal brand by creating and publishing relevant professional content on LinkedIn.
- PT Presentologics** **July 2023 - December 2023 (5 Months)**
Pengembang Front-End Web dan Back-End
I learned HTML, CSS, and JavaScript from basic to advanced levels for web application development. Covered soft skills such as personal productivity, growth mindset, communication and networking, personal branding, and interview communication. At the end of our studies, we worked on a final project: developing the MentalWell application, an online psychological counseling platform.
